OM JEE

+91-9135633401 | omjee7253@gmail.com | linkedin.com/in/om-jee-a13833285 | github.com/omjee001 | Mysore, Karnataka, India

EDUCATION

The National Institute of Engineering (NIE), Mysuru — Sept 2023 – Jul 2027 (Expected)
B.E. in Information Science & Engineering | CGPA: 8.01 — Mysore, India

Jagjiwan College, Arrah — 2019 – 2021
12th Board (BSEB) — Arrah, India

B.D. Public School, Arrah — 2019
10th Board (CBSE) — Arrah, India

PROJECTS

Telehealth & Real-Time Consultation Engine
Node.js, Express.js, React.js, MongoDB, Socket.io, JWT, Redis, bcryptjs

- **Real-Time Communication:** Built a bi-directional messaging engine using Socket.io, reducing latency for live doctor-patient consultations versus HTTP polling.
- **Guest Access Pipeline:** Designed a short-lived, stateful JWT guest login flow enabling emergency consultation access without full registration.
- **Automated Data Lifecycle:** Built background worker scripts to periodically purge inactive guest profiles and stale chat history, improving storage efficiency.
- **Presence Tracking:** Implemented real-time online/offline status and typing indicators by managing active socket connection state in-memory.
- **Secure Auth & RBAC:** Used bcryptjs for password hashing and JWT for stateless Role-Based Access Control across Admin, Doctor, and Patient roles.

Distributed URL Shortener & Analytics Engine
Node.js, Express.js, MySQL, Redis, Docker, Base62 Encoding

- **Stateless Backend:** Built a horizontally scalable Node.js/Express.js backend supporting high-throughput concurrent traffic with no local session dependency.
- **Distributed ID Generation:** Implemented collision-free short URLs using Redis atomic INCR for global IDs, encoded via a custom Base62 algorithm.
- **High-Availability Caching:** Designed a cache-aside pattern with Redis for sub-millisecond redirects, with fail-open fallback to MySQL on cache outage.
- **Horizontal Sharding:** Implemented hash-based sharding across MySQL instances using raw query clients, routing by short-code hash to avoid cross-shard joins.
- **Rate Limiting:** Deployed an IP-based sliding-window rate limiter backed by Redis to secure the write path against abuse.

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript

Web & Frameworks: Node.js, Express.js, React.js, REST APIs, HTML5, CSS3

Databases & Caching: MySQL, MongoDB, Redis

Real-Time & Auth: Socket.io (WebSockets), JWT, bcryptjs, Role-Based Access Control

Tools & DevOps: Docker, Git, GitHub

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems

ACHIEVEMENTS & CERTIFICATIONS

- **Data Structures & Algorithms:** Demonstrated consistent problem-solving proficiency on LeetCode and GeeksforGeeks.
- **Core Competency:** Proficient in advanced C++ concepts including classes, inheritance, polymorphism, templates, and the Standard Template Library (STL).
